

Exercise 5.3: Creating and Deploying a Lambda Function

Changes / Additions to PDF

Small changes to exercises

1. The alias is “leapfse” and not “roifmr” (roifmr is shown in the lab manual)
2. The student passwords are too short for AWS (minimum 8 requires) – so their AWS is their RVC password plus an ! mark.
3. Make sure the Java version in the JavaGreeter solution is set to jdk 11.0.17_8
4. Make sure when you Upload the code you pick Java version 11
